

I, Game & Robot monetization

Every new Nft minting must come with some bonus token and to be able to start playing, the idea that the user has the maximum possibilities to spend the tokens so they don't sell making the price drop quickly, the idea is to encourage the holder

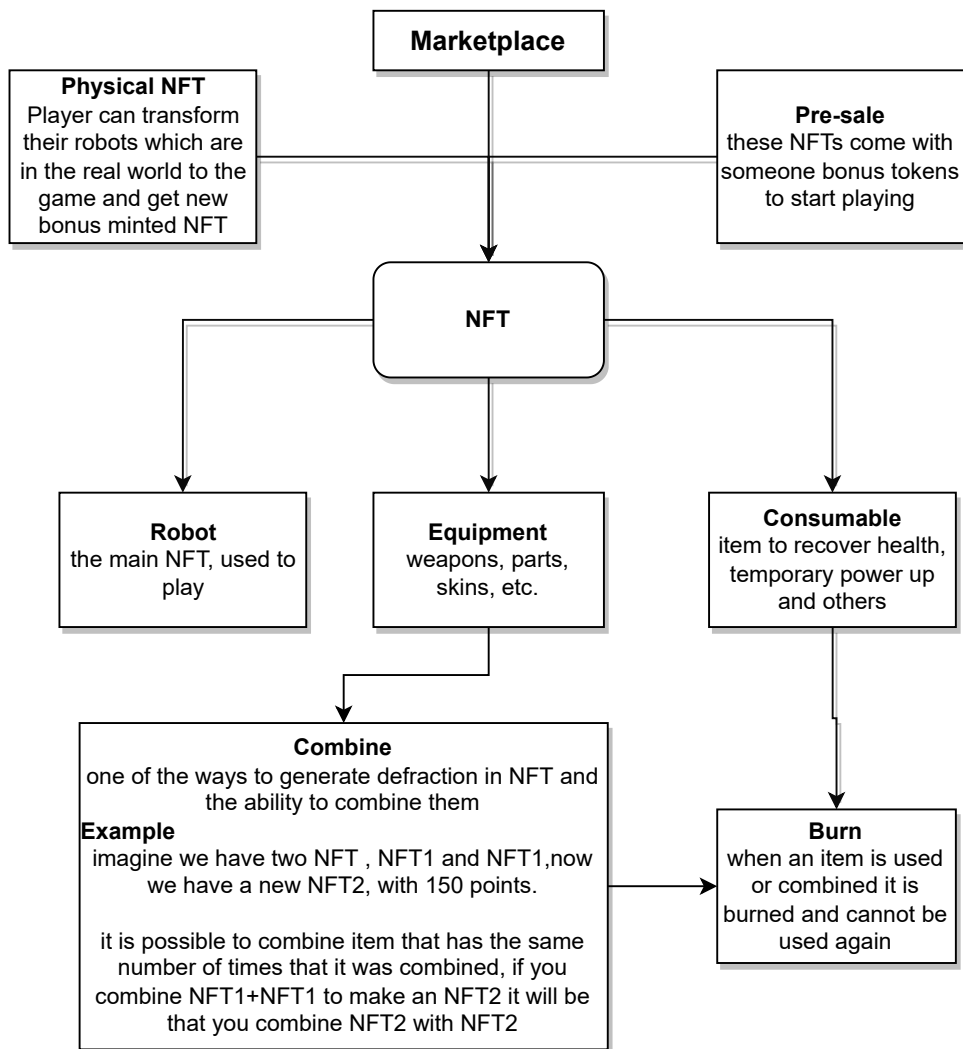

Utility token

the idea is to have several ways to earn and spend the tokens to make the economy work more inside the game than outside

NFTs

will have several categories of NFT some with unique abilities, one of the main features of these NFTs is the ability to burn them to create new NFTs and decrease the amount of them in circulation.

DAO and Marketplace

we will have a normal DAO with a difference that NFT will be used and not tokens, the NFT marketplace and combined with DAO
